User Guide Voiland Food Pantry Program

Version: Draft 2
Prepared by: Jodie Butterworth
Date: 4-23-26

Introduction

This document provides instructions for operating the ID Card and Barcode Scanning System. It is intended for end users and clients to understand system functionality and basic operations.

System Overview

The system includes the following components:

- **Software application for data entry and management**
- **Card swipe/ID reader for user identification**
- **Handheld barcode scanner for item input**
- **Database for storing user and item records**

STUDENT USER GUIDE

First-Time Student (Registration)

Step 1: Arrive at the system

- You will be identified (likely by ID scan or input).
- If you are new, the Registration Popup appears.

Step 2: Complete Registration

1. Select your Class Year
    - Freshman / Sophomore / Junior / Senior
2. Enter your Major
3. Click “Complete Registration”

Your account is now created in the system.

Returning Student (Check-Out Process)

Step 1: Welcome Screen

- You'll see:
    - "Welcome back"
    - Empty scanned items list

Step 2: Add Items

1. Click "+ Scan/Type Item"
2. Enter or scan the product code (UPC)
3. Click Add

- If valid → item name appears
- If invalid → error message

Step 3: Confirm Item

1. Review item name
2. Click "Confirm Add"

Item is added to your list

Repeat until done.

Step 4: Submit Visit

1. Click "Submit Visit"
2. System:
    - Saves items
    - Records visit with timestamp
    - Links visit to your student profile

VOLUNTEER USER GUIDE

Register as Volunteer

Step 1:

- Go to Volunteer Register Page

Step 2:

Fill out:

- Full Name
- Email
- Password

Step 3:

Click Register

Account is created in the database

Login

1. Enter:
    - Email
    - Password
2. Click Login

Volunteer Dashboard

After login, you'll see:

Features:

- Welcome message
- Total hours worked
- Recent submissions

Submit Volunteer Hours

Step 1:

Enter:

- Hours worked (0–8)
- Date (limited to last 2 weeks)

Step 2:

Click Submit Hours

System stores:

- Hours

- Date
- Linked volunteer

ADMIN USER GUIDE

Default Login

When system starts, a default admin is created:

- Username: admin
- Password: password123

Note: As I write this, the dev team is making changes.

Inventory System

Admins can:

- View all items
- Track:
    - UPC
    - Product name
    - Weight
    - Quantity

Pantry Analytics Report

Step 1:

Open Report Page

Step 2:

Filter Data (Optional)

- Select:
    - Start Date
    - End Date
- Click Filter Report

Step 3:

View Data

Includes:

- Total inventory items
- Low stock items (≤ 5)
- Visits by major
- Popular items by major
- Total weight distributed
- Full inventory list

Step 4:

Download Report

- Click “Download PDF”
- Includes filtered data

Volunteer Hours Report

Step 1:

Open Volunteer Report Page

Step 2: Filter by Date

- Start date
- End date

Step 3: View Table

Shows:

- Volunteer name
- Email
- Total hours worked

Step 4: Export

- Click Download PDF

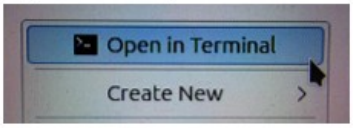
Instructions provided by Alexander Langland (subject to update):

Voiland Food Pantry

Management Software – Operation Instructions (BETA)

STARTING THE WEBSITE:

1. Turn the NUC Computer on.
   Username: voilandfp
   Password: vfpadmin
2. Open the folder PantryApp on the desktop, then 11-FA25-SP26-F-WEB
3. Right click anywhere in the file explorer, and select "Open in Terminal"



4. Type the following command and press enter:
   cd code/backend ; mvn spring-boot:run;
   Wait. If the last line is as follows, it is working:
   "Hibernate: select count(*) from admin_users au1_0"
5. WITHOUT closing that window, return to the desktop.
6. Right click anywhere and select "Open in Terminal" once again.
7. Type the following command and press enter:
   firefox --kiosk localhost:8080;

The website should now be open. Record an error if this does not open the website as intended

Instructions provided by Alexander Langland (subject to update):

USING THE WEBSITE:

If using as a student checking out items, click on "Student Portal"

If using as food pantry staff, click on "Staff/Admin Portal"

CURRENT ADMIN LOGIN (SUBJECT TO CHANGE):

USERNAME: admin

PASSWORD: password123

Right now, functionality exists to manage inventory and view reports on pantry activity. Instructions for admin and student activities exist within the website.

EXITING THE WEBSITE:

1. Press Ctrl, Alt, and F3 at once.
2. If the bottom line is "voilandfoodpantryterminal login: " (IF NOT, GO TO STEP 3), type "voilandfp" and press enter. When "Password: " appears, type "vfpadmin" and press enter.

   NOTE: any characters typed while inputting the password will NOT appear on the screen for safety reasons, trust that they are still being typed!
3. The bottom line should now be "voilandfp@voilandfoodpantryterminal:~$". Type "killall firefox" and press enter.
4. Type "logout" and press enter.
5. Press Ctrl, Alt, and F2 at once to exit this screen.
6. Close all existing windows.

   If asked if you are sure you want to close a window, say yes.

At this point, the NUC Computer should be ready to be turned off if necessary. The website can be brough back using the "Starting The Website" procedure on the other side of this document.

Using the Card Reader

Steps:

1. Ensure the card reader is properly connected
2. Navigate to the card input section of the application

3. Swipe the ID card on the reader
4. Register if a first time user
5. Save or confirm the entry

Using the Handheld Barcode Scanner

Steps:

1. Ensure the scanner is powered and connected
2. Open the item entry or scanning section
3. Point the scanner at the barcode
4. Press the scan trigger
5. Confirm that item data appears in the system
6. Save or confirm the entry

Data Entry and Management

- Verify all data before saving
- Avoid duplicate entries
- Ensure required fields are completed
- Log out after use

Troubleshooting

Login Issues

- Verify username and password
- Check for caps lock
- Reset password if necessary

Card Reader Not Working

- Check connection (USB/Bluetooth)
- Restart the application
- Try a different card

Barcode Scanner Not Working

- Check power or battery
- Ensure proper connection
- Clean scanner lens
- Verify barcode is not damaged

Data Not Saving

- Confirm database connection
- Check required fields
- Restart application if needed

Known Limitations / Notes

(from Kaitlyn Cornish email dated: 4-21-26)

1. **Altering UI features (i.e. title)**
   UI elements such as titles are defined in the front end HTML files. Any changes would need to be made directly in those files, so an admin would need to update the code manually.

2. **Editing database data and tables**
   Database content can be viewed and modified through MySQL Workbench or via the terminal using SQL commands.

3. **Logging in and browser usage**
   The application can be accessed through any web browser set as the default on the user's computer. After running the project locally via the terminal, users can open the provided URL in their preferred browser. Set to Firefox right now.

4. **Exporting/printing reports**
Reports can be downloaded using the download button on the webpage. The file will save to the computer's Downloads folder, where it can then be opened, printed, or shared, for example, through email.

5. **Potential future improvements**
One major improvement would be transitioning the application to a cloud-based system. This would allow easier access from any computer without requiring local setup and would improve scalability and usability.

Security Best Practices

- Use strong, unique passwords
- Do not share accounts
- Log out after each session
- Report suspicious activity immediately
